About Me:

I am a Mechanical Engineering student at the University of Connecticut. I am passionate about the automotive industry and creating sustainable technology that will last for years to come. Currently president of EBRC which helps the research of electric powered boats in a gas dominated industry.

Clubs:

Electric Boat Racing Club - President

An engineering club focused on designing electric boats with the American Society of Naval Engineers (ASNE) to make electric propulsion a forefront in sustainable boating.

- Improved aerodynamics of the boat on the design team.
- Designed/Prepped/Painted "Seadog II" boat design.
- "Big Dawg I" Hull design Team Lead
- Worked on "Seadog II" which won the UCONN DEMO Day ECE 1st place prize 2025.

UCONN Fencing Club - Armorer / UCONN Outing Club - Member

Fixing weapons and cords for the UCONN fencing team. Team player on outing trips.

Internship Experience:

General Dynamics Electric Boat: Quonset Point Summer Engineering Intern.

Managed delivery and preventative maintenance scheduling for industrial gas systems critical to ensuring continuous class 1 submarine production. Worked with senior engineers to solve critical system roadblocks that halted production. Developed working knowledge of critical systems in order to scale industrial defense manufacturing operations into more buildings.

Personal Projects:

Robot Study Assistant - "Copper"

Constructing a small cat robot to keep you on task while studying. The main goal of this project is to get hands on building with electronic components along with designing in Solidworks (3D Printing). Eventually working up to a small scale custom battery.

Personal Brand - @gabriel._bartlett

Making videos that document my engineering processes.

Relevant Work:

UCONN College of Engineering, - Ideation Studio Assistant

January 2026 - Present

Maintain and organize collaborative space for students to work on engineering projects in ideation studio / shop. Help students effectively use 3D printers / laser cutters.

UCONN College of Engineering, - Facilities Maintenance Assistant

August 2024 - January 2026

Coordinated with faculty and staff to finish work orders for the college of engineering. Any job from moving offices / furniture to surplus technology for recycling. Leading a small team of students to and from jobsites.

Skills:

AutoCAD
Solidworks
Computers
Python / Java
Leadership
3D Printing
Laser Cutting
Photoshop
AED/CPR/First Aid
Communication
DaVinci Resolve
Storyboarding
Videography / Cameras
Electronic Components
Public Speaking
Writing
Soldering
Painting
Corrigo Enterprise
Working under pressure
Excel / Word

Education:

University of Connecticut

Class of 2028

Mechanical Engineering Major

UConn Student Activities, - "Weekend Of Welcome" (WOW) Captain

August 2024 - January 2026

Working with student activities staff to find, interview, hire, and train almost 100 employees for UConn's "Weekend Of Welcome" event for incoming first year students. WOW: An event where leaders / captains greet first year students and make the transition from high school to college a little less stressful. Engaging students in activities and the community / school culture.

Volunteer Work:

UConn College of Engineering / Engineering Ambassadors, - UConn Bound Tour Guide 2025 / 2026

Volunteered and led engineering tours for the college of engineering around campus.

Scorekeeper / Timekeeper - Vergnano Institute for Inclusion - National Science Bowl 2025 / 2026

Spent a day for 2 years volunteering setting up, judging, and breaking down the 2025 Science bowl competition.
